Subject: R10 PFAS EJ

Hi Chan and Patrick,

Thank you again for filling in the Excel Spreadsheet survey for the PFAS EJ screening. We would like to start with one or two sites. In the long term, the project has capacity to do six sites. JBLM and Whidbey both have PFAS off site with known tribal interest. Based on that, I think they would be great sites to start with.

The next steps for this would be for Teams meeting with the contractor (Skeo). Then Skeo would gather some site specific information, develop interview questions, conduct interviews, and make a report.

What do you think? If you're down, I can setup a meeting for us and Skeo.

Thanks,

Erin Gleason
